

# SOCHEM

## SOLUTIONS

The three founders of Sochem all worked for a large chemical company, and thought there was a better way to do business. By doing the right thing, no matter what. That driving principle has lead Sochem to over 20 years of supplying our customers with top notch service and quality.

Recently Sochem has expanded to a second location, and nearly doubled its staff. We are large enough to fill any needs you may have, but small enough to give the attention you deserve as well.

The ownership of Sochem has over 150 years combined experience in the chemical industry! Let Sochem create solutions you can use!

## SHARP

SOCHEM IS A SHARP APPROVED  
FACILITY RECOGNIZED BY THE LOUISIANA  
WORKFORCE COMMISSION FOR  
EXCELLENCE IN SAFETY AND HEALTH  
PRACTICES

### Let us Sweat the Small Stuff!

- Sochem can monitor ALL of your vats so that your personnel can worry about production, not chemistry.
- We regularly receive samples from process vats on each plant's schedule. Our in house lab will run a full battery of tests to determine the health of your vats. Based on those results, we can generate recommendations to put your process back to spec if needed.

## SOICHEM AT A GLANCE

Sochem Solutions has been providing service, quality, and innovation since 1994. Founded as a custom chemical manufacturer, the connection between Sochem and the Galvanizing industry is as cohesive as zinc to iron!
